Usage

Technical Specifications:

Chemical Structure

- ◆ The combination of water-based pure acrylic rosin resins.

Density

- ◆ 1.52 g / cm³

Diluting

- ◆ There is no need to thin adhesive. Aktut is ready to use.

The amount of solids

- ◆ %50 – %60

Packaging

- ◆ 4 kg , 8 kg , 16 kg plastic bucket

Drying time:

- ◆ 20° C 20-30 minutes to dry enough to paste, full cure in 24 hours.

Storage

- ◆ Should be stored between 5 and 35 °C protect direct sunlight and packaging should be kept sealed, must be protected from freezing.

Covering Capacity

- ◆ Theoretical:
12 m² / lt (20 µ dry film thickness)
Practical:
0,100 - 0,110 lt/m² (single layer)
0,090 - 0,100 kg/m² (single layer)
